EDUCATION

Degree / Field	Institution	Year	CGPA
Master of Science (NT & IT)	St. John's College, Manonmaniam Sundaranar University, Tirunelveli.	2024-2026	8.67
Bachelor of science (AI & ML)	Vels University, Chennai.	2021-2024	8.2
Higher Secondary School	Punitha arulappar hr sec school, Avudayanoor, Tenkasi dt.	2019-2021	91

TECHNICAL SKILLS

Programming Languages	Python, SQL
Web Technologies	HTML, CSS, Rest API Basics
Database	MySQL, DBMS
Tools & IDE	VS Code, Excel ,Git & Github
Soft Skills	Problem Solving, Time management, Teamwork

PROJECTS

1. Smart Car Parking management with predictive analysis

Technologies: Python, MySQL, Machine Learning

- The Smart Car Parking Management System helps users find available parking slots, reduce waiting time, and book parking spaces efficiently through a user-friendly application.
- The project uses machine learning to predict parking slot availability based on historical parking patterns, time, and area details.
- The system integrates Flutter frontend, FastAPI backend, database management, and payment processing for smooth parking operations and booking confirmation.

2. Chat pdf generating conversational text summaries using llm in python

Technologies: Python, OpenAI GPT-LLM, SQLite, Langchain

- This project allows users to upload PDF documents and automatically extracts important textual information for better understanding.
- The system uses Large Language Models (LLMs) to generate conversational summaries and answer user questions naturally.
- By combining PDF processing, embeddings, and semantic search, the project provides accurate context-based responses quickly.

3. AI-Based Resume Screening and Candidate Ranking System Using Java

Technologies: Python, MySQL, NLP, REST API

- Developed an AI-based resume screening system to analyze resumes and match candidate skills with job requirements.
- Implemented resume parsing and skill extraction from PDF documents using keyword/NLP techniques.
- Generated candidate matching scores and ranking system to help recruiters shortlist suitable applicants.

INTERSHIP & EXPERIENCE

- Completed Machine Learning Internship at Cognifyz Technologies working on rating prediction, recommendation systems, and cuisine classification.
- Completed Machine Learning Internship at Bevywise networks working on a Smart Car Parking System using machine learning and image processing.

CERTIFICATIONS

- Completed College-level Coursework on Advance Excel by Global Theoretical Research |
- Completed Coursework on Machine Learning covering both Theory and practical by Pantech e Learning
- Certificate of Participation – **Industrial Visit** | Srishti Campus, Trivandrum | September 2025
